Create your battle droid army and take over the galaxy!

If you like this model, please throw me a like. Designing the models is time, filament and coffee consuming. **If you want to support my work bye me a coffee.** Thanks!

[Check out my other models.](#)

Description:

I made a kit card remix of the model. The connections have been improved for better assembly and the figure should now stand better.

[B1-2.0 Kit Card](#) Check it out!

This model looks more like the original droid as the remix, if it is important to you then print this.

The figure has a height of 225mm and is movable at the joints.

I recommend **PETG** to make the small parts as strong as possible. Of course, **PLA** or **ABS** also works, but the assembly must then be done carefully.

Some parts have different designs. For example a frame without the backpack clip. Look in the special parts folder.

May the force be with you!

Roger roger!

Printing:

Layer height: **0.1**

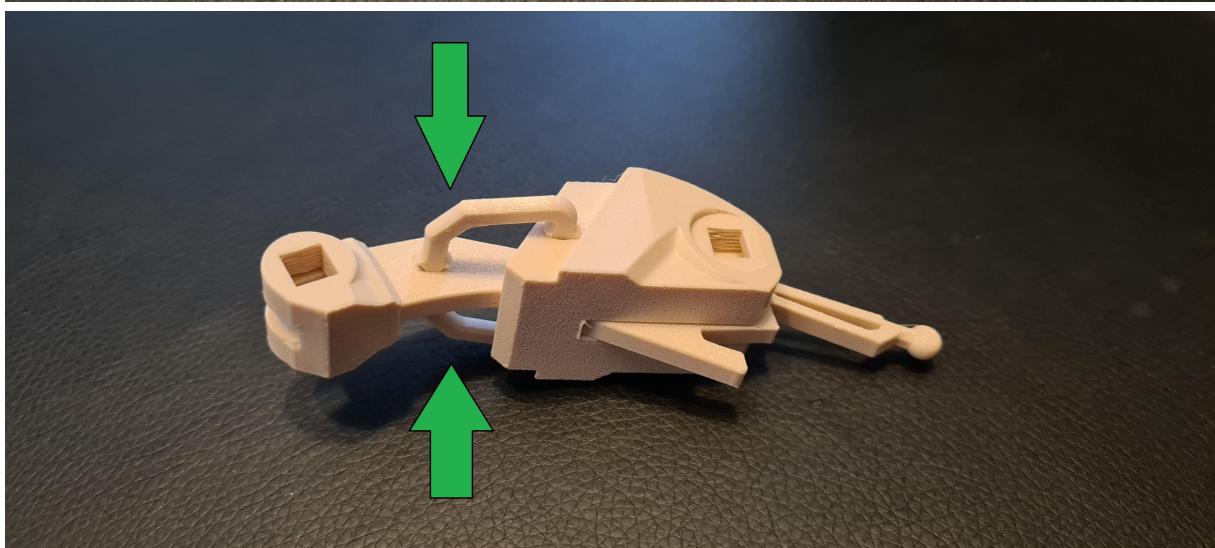

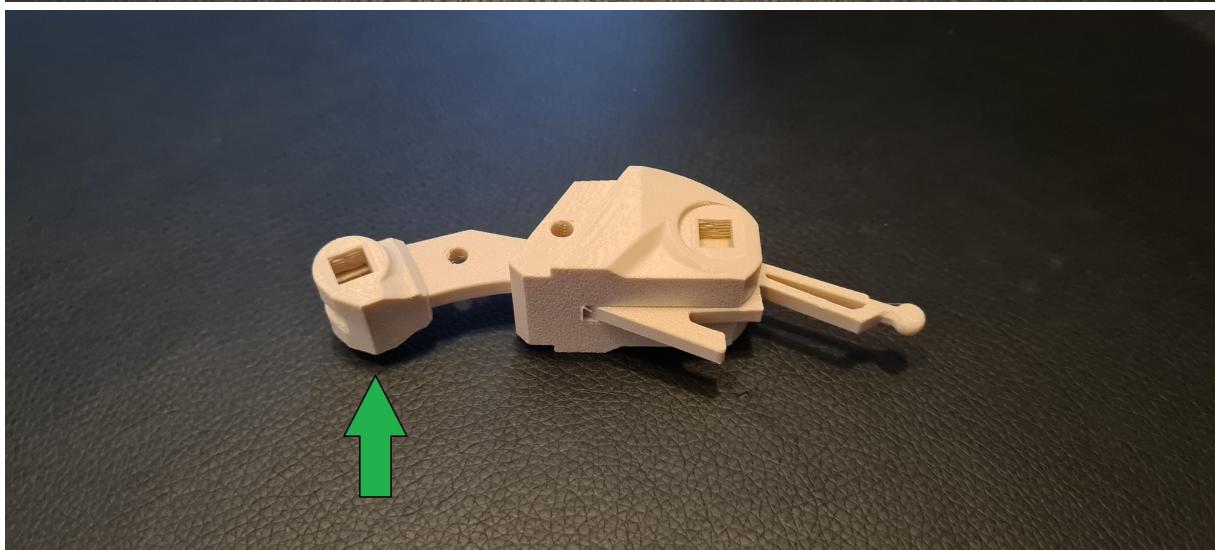

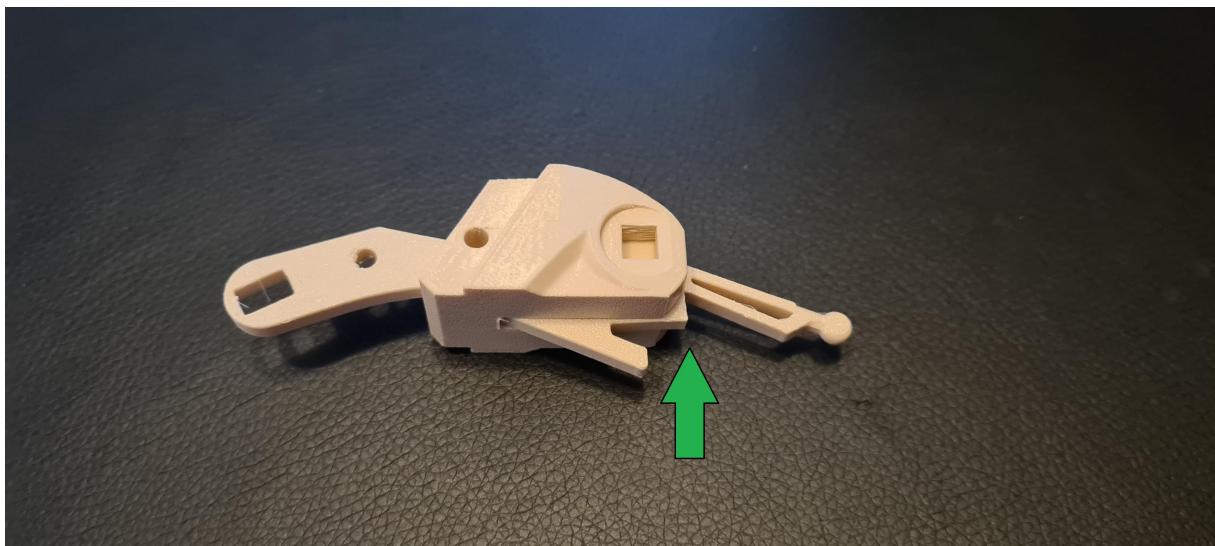

Supports: **No**

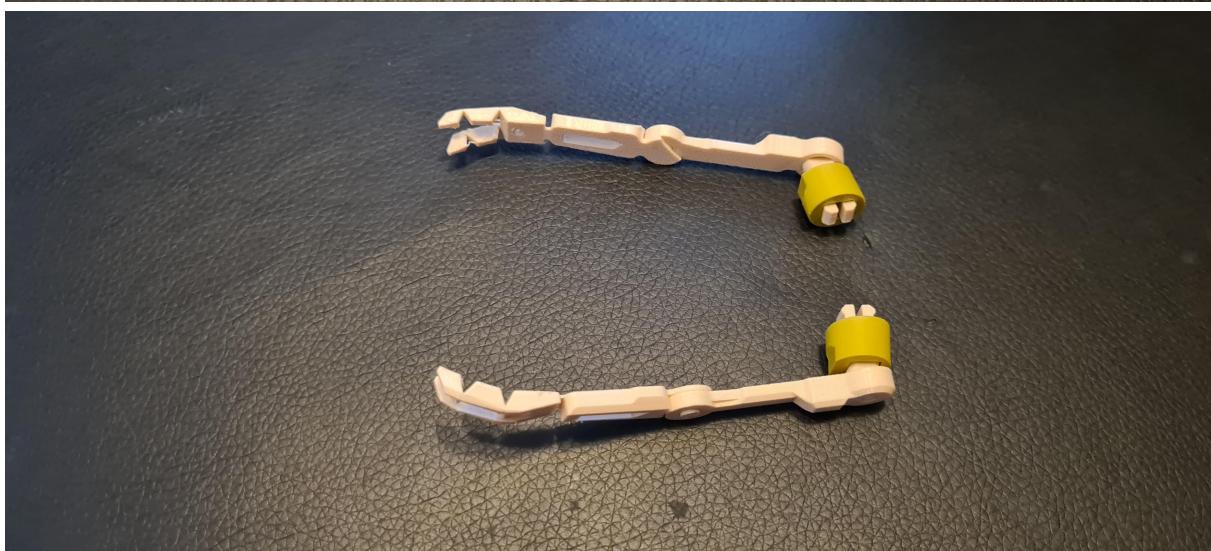

Material: **PETG, (ABS), (PLA)**

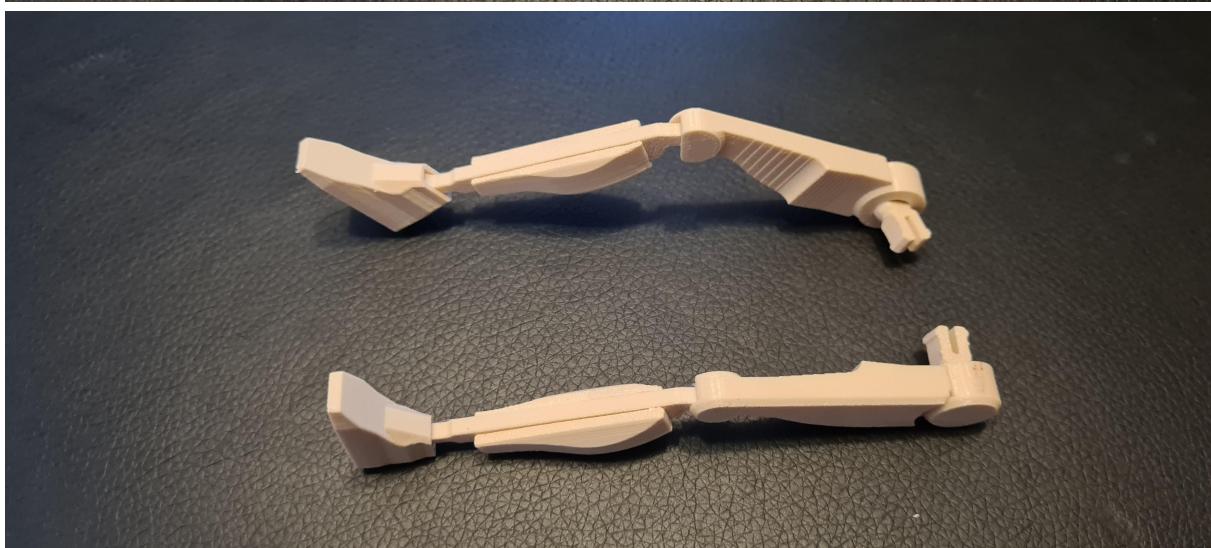

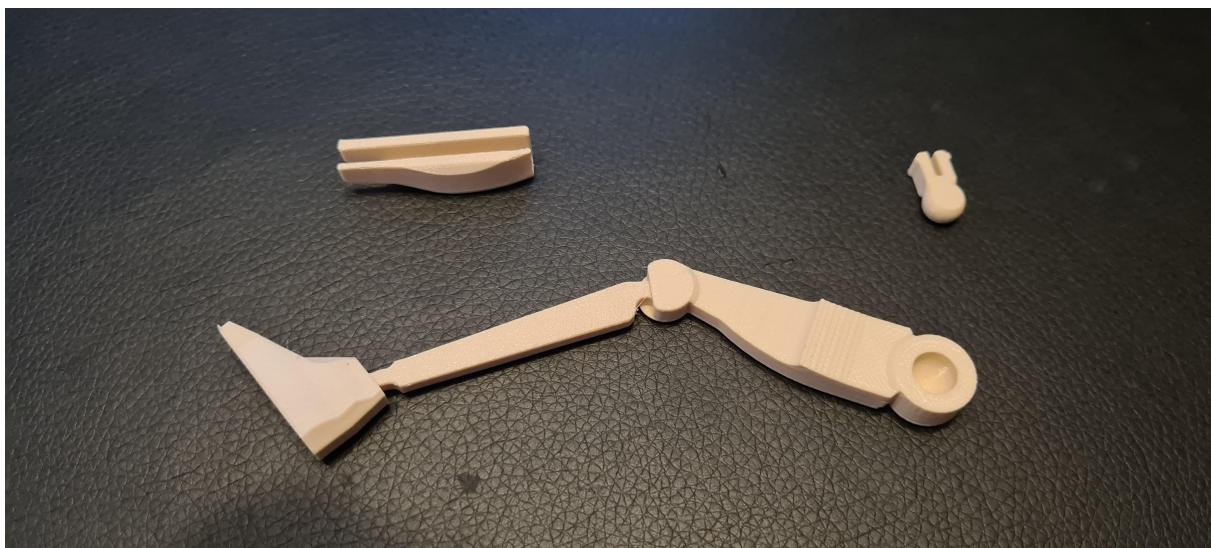

Assembly:

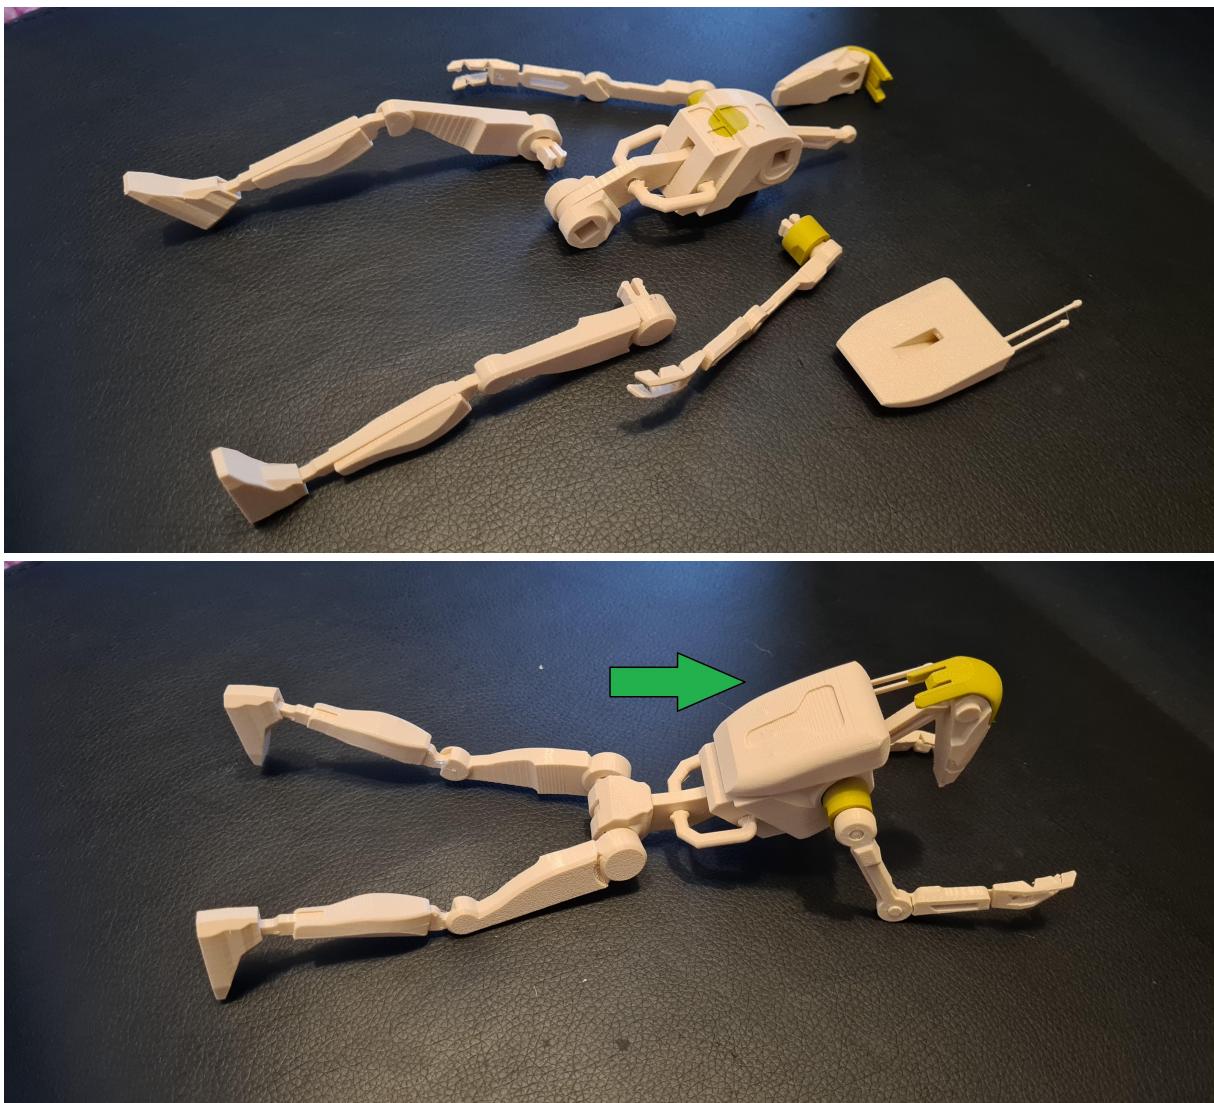

You can also look at the B1_Assembled file for assembly.

In order to replicate the design of the B1 battle droid as closely as possible, I was forced to make some parts very fragile. Please be ready to reprint parts in case of breakage. Separate parts are located in the respective folders.
